

DJs & Bands

- Set-up must be complete 1 hour before the wedding ceremony time.
- Vehicle can be parked out front or in the handicapped area to unload equipment, but after unloading, please park in the rear of the parking area.
- We provide a 5-6ft table and black linen if needed, but you're required to bring everything else required to perform your service.
- There is no staging. Set-ups are on ground level concrete in spot designated by the day-of planner/venue manager.
- Outdoor bands are not an option. Speakers can be set up outside during cocktail hour, if the music is played at a reasonable sound level.
- For the ceremony, level ground and covering is not promised, especially with large weddings. Electrical outlet is available.
- All equipment must be setup/sound checks done by 1 hour prior to the wedding ceremony, with no exception. This includes instances where the band is not starting until the social period or later.
- Equipment must be completely broken down and removed from the premises within one hour of completion of the event. It is the band/DJs responsibility to have adequate help to ensure this is done in the proper amount of time.
- There is no promised space to store equipment cases. Equipment must either be contained within the designated DJ/band area (while appearing neat and orderly) or loaded back into a vehicle for later use when packing up.

Photo & Video

- A copy of the timeline will be provided to you in advance (typically ~1 month prior to the wedding). We will give you a copy of the timeline when you arrive at the wedding and we follow it very closely due to dinner timing. Dinner will always be served according to the time noted on the timeline.
- If height is needed for a picture, please bring a ladder or ask us to provide you one in advance. Standing on chairs will not be allowed.
- The meadow and surrounding spaces are open to all to take pictures and mingle around (minus the pond/stream area). Please be mindful of the grass areas as to not damage or create holes in the ground. Please do not climb over meadow fencing, please go around the opening at the back.
- The outdoor barn doors can open and close for photo opportunities.
- Shoes must be worn at indoor and outdoor spaces at all times.
- If drones are going to be used, please see "Drone Guidelines" on the [Vendor Resources page](#).

Bakers

- Delivery of cake or dessert must be completed 1 hour before the start of the ceremony.
- Cake boxes must be provided by the bakery if the client wishes to save the top layer of the cake.
- Baked items may only be delivered on the day of the event, no earlier than 1pm. Earlier set up time must be cleared with your day-of planner/venue manager.
- Limited refrigeration space is available, only if absolutely necessary. Please seek out your day-of planner/venue manager to assist. Cake must be completely assembled and sturdy enough to move from the refrigerator to the main hall without toppling or being damaged.
- If couples are adding their own toppers, Bull Meadow will have the final discretion on these. If they present an issue they may be put beside the cake.
- Unless specified by the baker, we assume all non-edible parts of the cake will not be saved. If pieces are to be saved, they must go home with you that night.
- Additional desserts need to come ready to serve. (Unless otherwise discussed ahead of time including associated costs) Bull Meadow does not provide platters or any other items to display baked goods, favors or decorations.

Designer Touches

- We often work with designer Anna Yasharian, who owns the company [Designs by Anna](#). She can provide drapery, lighting, tablescape, florals, signage, and other personal details.
- You can work with any decorator that you'd like, but we would prefer you work with Anna as she has been to the barn countless times, and she is very familiar with what we have/don't have, and our guidelines. She's able to make just about anything happen, and truly loves to make the Barn look one-of-a-kind for your special day!

Equipment Rental

- Any outside rental equipment must be discussed with your day-of planner/venue manager including an agreed upon delivery and pickup time.
- Bull Meadow does not assist with set-up of rented furniture, photobooths, and other large or constructable items, unless otherwise agreed upon by the day-of planner/venue manager.
- Depending on specific setups or extraneous time needed by Bull Meadow staff to use/work with equipment there may be labor costs assessed. These should be discussed along with plans about equipment prior to ordering.
- Bull Meadow does have sidewalls and a heater available for rent for the tent. Please talk with your day-of planner/venue manager to arrange this at least 7 days prior to your wedding.

Florists

- Contact the day-of planner/venue manager for the earliest time you can set up. It will need to be completed at least one hour before the start of the ceremony.
- Attaching flowers to the fence, pavilion, barn, etc. needs to be done with items that won't puncture or damage the wood. Wrapping and tying flowers in place is acceptable. No adhesive products, nails or staples are allowed when decorating the facility (accepted materials include, but are not limited to: fishing line, zip ties, pipe cleaners, command hooks and string)
- We do allow standard Sheppard's Hooks (1/4" puncture), although it is not Bull Meadow's responsibility to set them up.
- If items are borrowed or rented as part of the decoration, they will need to be removed from the Barn that night unless otherwise discussed by the day-of planner/venue manager or using the Decoration Clean Up Services provided by Bull Meadow (pickup is typically 9:30-10:30am the following morning).
- No live flames are allowed as decorations anywhere on the property, except for a candle lighting ceremony if desired.
- Centerpieces may not include items such as: confetti, loose glitter, sand, shards of glass, water beads ("Orbeez"), flame of any kind (LED candles can be used).
- Potted plants or other such potted items are allowed around the edges of the pavilion or barn for decoration provided they are stand alone and have a good heavy base to protect from toppling in the wind.
- In case a wedding couple wishes to decorate the ceremony pavilion you can find the dimensions below.

-
- Technical drawing of a roof truss system. The drawing shows a cross-section of the truss with the following dimensions and components:
- Roof Slope:** The roof pitch is indicated as $15' - 7 \frac{13}{16}"$.
 - Truss Height:** The vertical height from the base to the peak is $7' - 0 \frac{7}{16}"$.
 - Base Width:** The total width at the base is $24' - 0"$.
 - Overhangs:** The overhangs on either side of the main truss are $2' - 0"$.
 - Truss Depth:** The depth of the truss is $8' - 0"$.
 - Roof Height:** The total height from the base to the peak is $15' - 0 \frac{7}{16}"$.
 - Structural Components:** The truss consists of two main rafters, a central vertical post, and two diagonal bracing members. The rafters are connected to the central post and the base using black metal brackets.
